

The power of the platform

Empower **everyone** who needs to create
business software.

Your solutions,
your way
Now, **augmented**

**All deployed on
an enterprise
ready platform.**

**Managed
security**

Advanced
protection for an
AI-driven world

**Managed
governance**

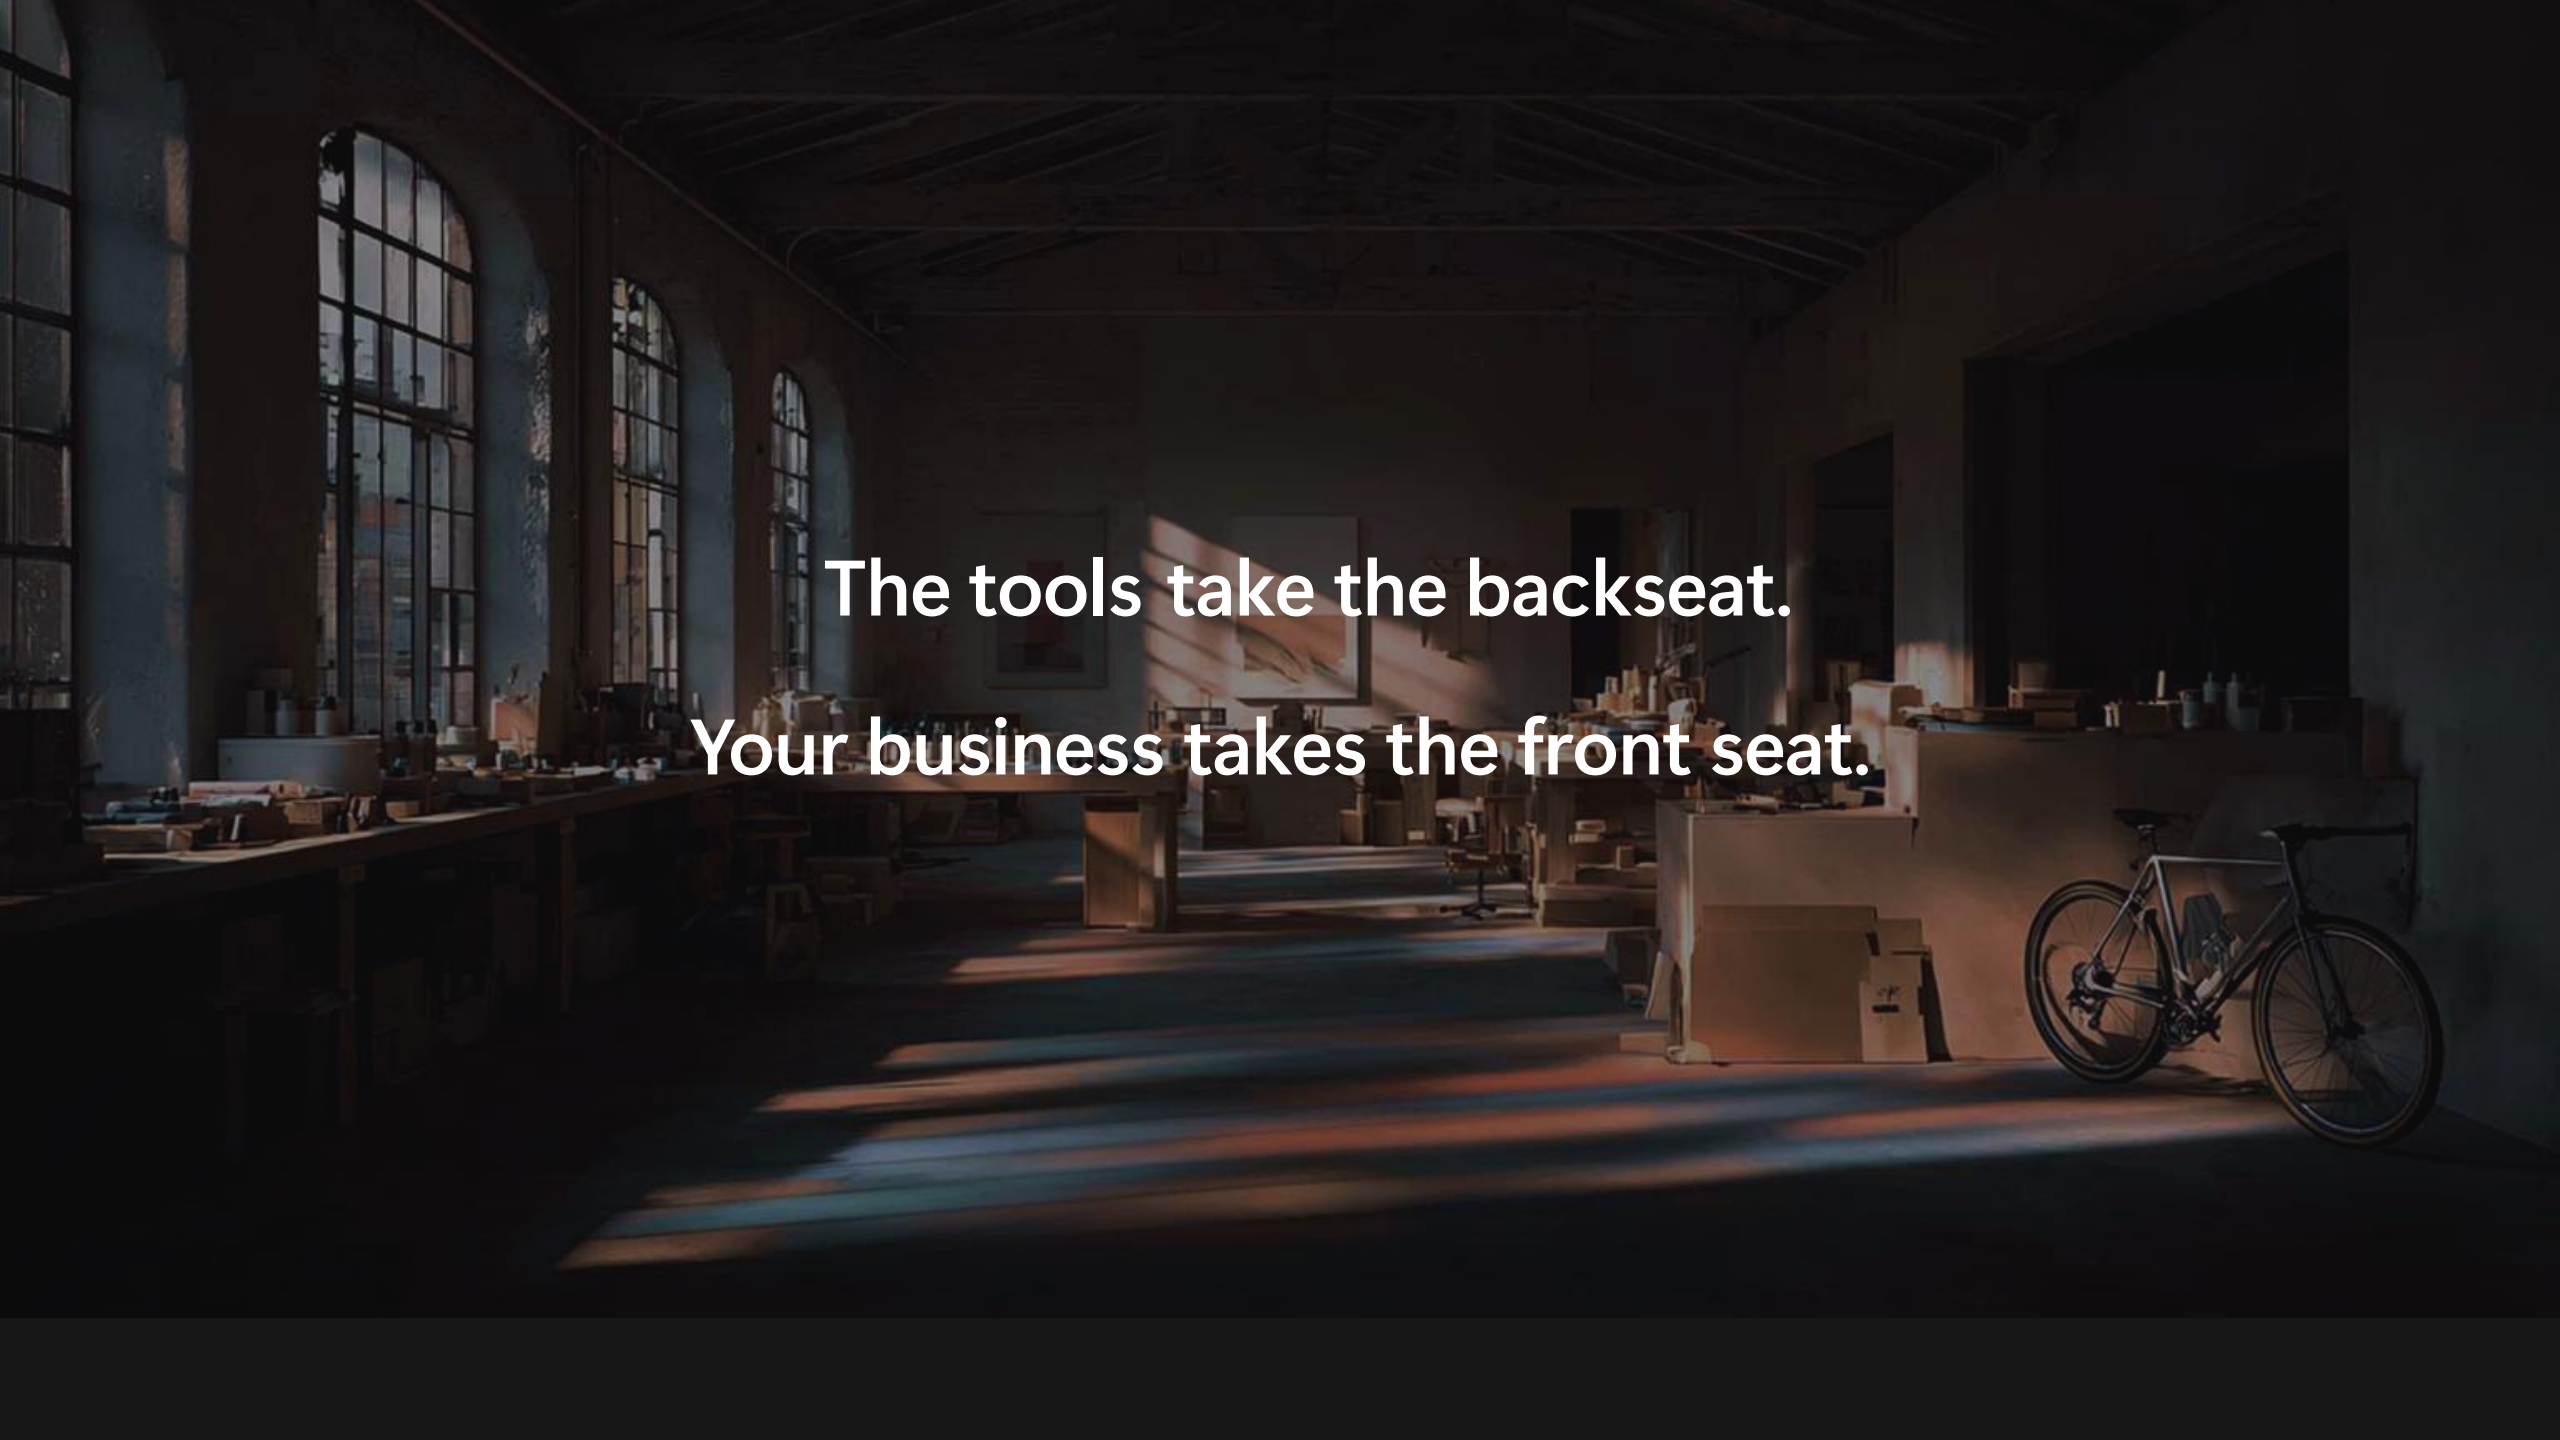

More visibility,
more control,
less effort

**Managed
operations**

Operational
excellence for
agents at scale

**Managed
availability**

Enterprise-grade
reliability for mission
critical workloads

A dark, atmospheric photograph of a workshop or studio. The room features large, arched windows on the left side, through which light is streaming, creating long, dramatic shadows across the floor and workbenches. The space is filled with various tools, materials, and workbenches, suggesting a creative or industrial environment. A bicycle is parked on the right side of the frame. The overall mood is quiet and focused.

The tools take the backseat.
Your business takes the front seat.

Power Series Labs

Bring AI Inside Your App: Natural Language Queries, Auto Charts & Smart Form Fill

The Power Series

One Catalog. Five Tracks. Endless Possibilities.

Let your business need shape the solution.

The Power Series gets you hands-on with every Power Platform capability, so you design the right solution for any business process – one or more apps, automations and agents, working together on a governed foundation. Run a track end to end, or pick the modules that fit your scenario, audience and skill level.

Digitize Internal Operations

Replace manual work with focused apps and connected data

Automate workflows and processes

Reduce repetitive work with automation, approvals, and AI

Improve customer interactions

Create secure experiences for customers, partners and communities

Modernize existing applications

Evolve legacy solutions with modern apps, automation, and AI

Strengthen governance and security

Apply guardrails, visibility, and control across the platform

The Power Series

Lab: Bring AI Inside Your App: Natural Language Queries, Auto Charts & Smart Form Fill

- Create a code app connected to Dataverse
- Add optional custom connectors, flows and custom agents to a code app
- Publish to Power Platform and view a code app on PowerApps.com

Deploy apps that enhance user productivity

Smarter workflows, less drudgery and repetition

Enter data 30% faster: Get smart auto-complete and auto-suggestions to expedite data entry

Find insights instantly: Search, filter, and visualize your data in seconds with built-in exploration and visualization tools.

Summarize at-a-glance: Instantly surface key takeaways with smart summaries, so you can get to decisions faster.

Bring AI assistance directly into the business app.

In-app agents help employees understand data, make decisions, and take action with relevant context.

Business scenario: Customer 360 case review

A support representative opens a customer record with several active and historical cases.

- The agent summarizes the customer's issue history across multiple cases.
- It identifies recurring problems, outstanding actions, and important patterns.
- When the recent call transcript is shared the agent auto-fills the form fields.

Impact: easier information discovery, more efficient form completion, and more complete records.
