

# The power of the platform

Empower **everyone** who needs to create  
business software.

Your solutions,  
your way  
Now, **augmented**

**All deployed on  
an enterprise  
ready platform.**

**Managed  
security**

Advanced  
protection for an  
AI-driven world

**Managed  
governance**

More visibility,  
more control,  
less effort

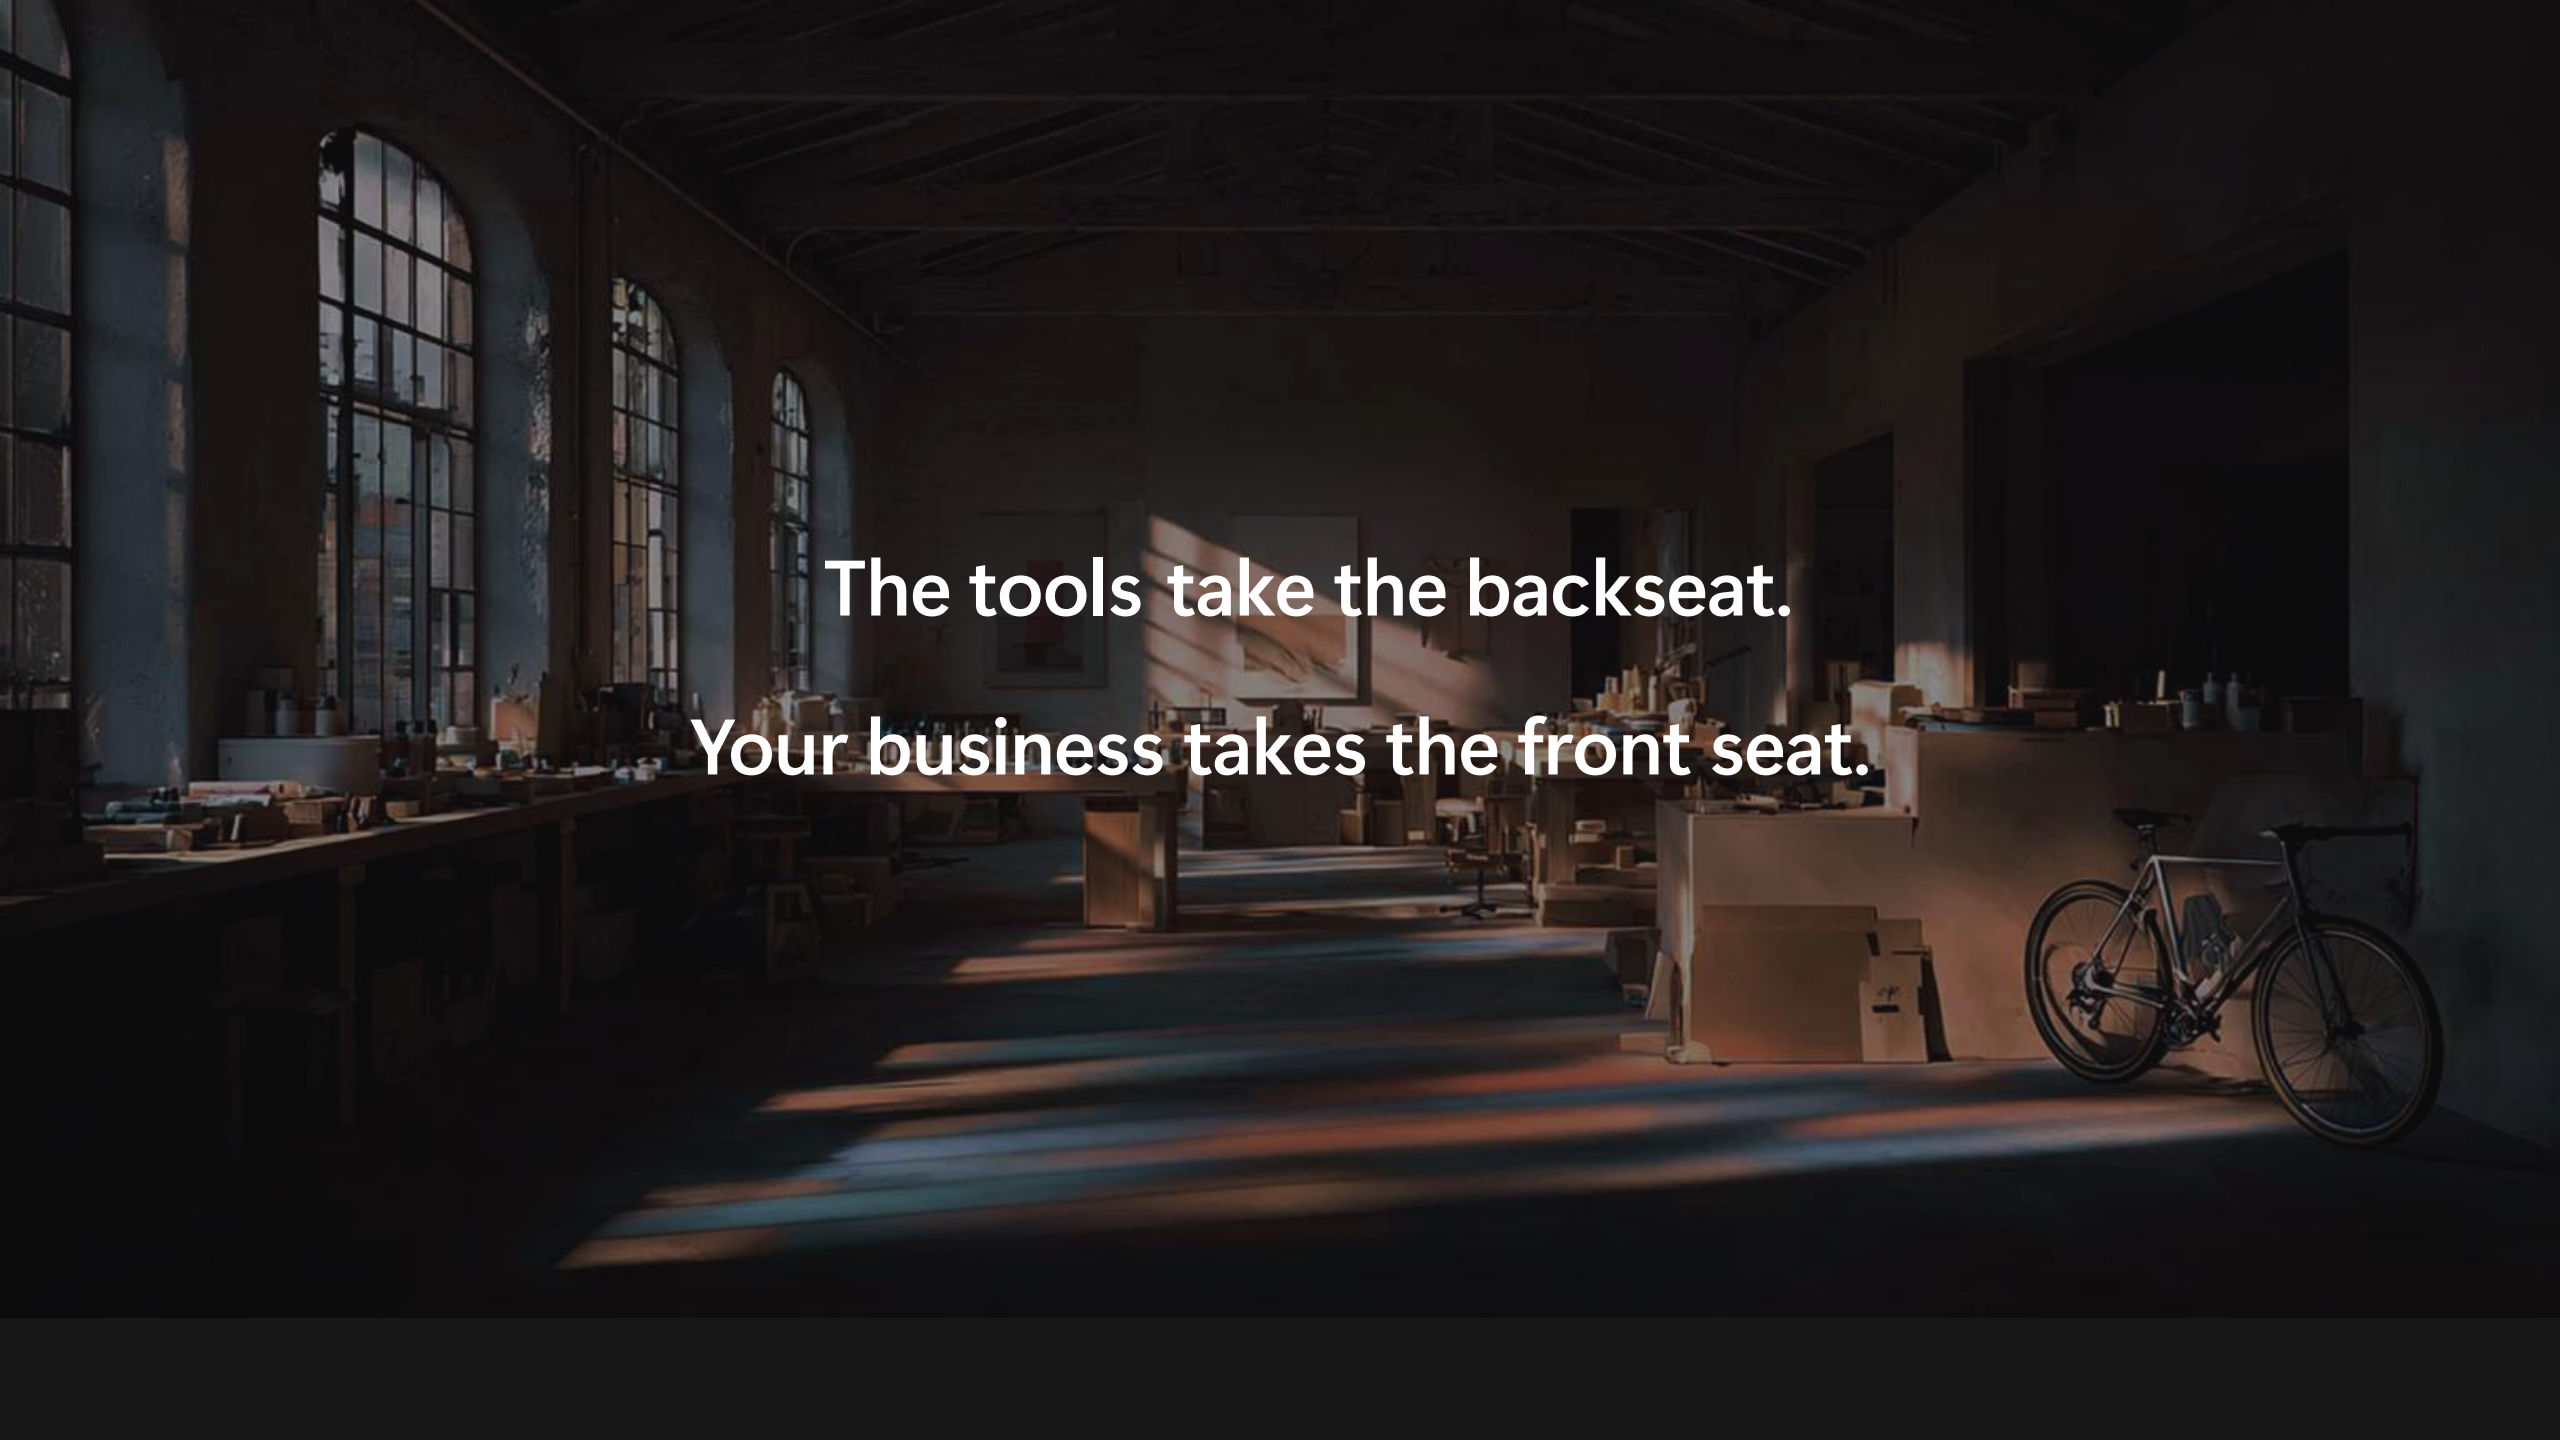

**Managed  
operations**

Operational  
excellence for  
agents at scale

**Managed  
availability**

Enterprise-grade  
reliability for mission  
critical workloads

A dark, atmospheric photograph of a workshop or studio. The room features large, arched windows on the left side, through which some light is visible. The interior is dimly lit, with long, horizontal shadows cast across the floor and workbenches. In the foreground, a bicycle is parked on the right. The background shows various workbenches, tools, and materials, creating a sense of a busy, creative space. The overall mood is quiet and contemplative.

The tools take the backseat.  
Your business takes the front seat.

# Power Series Labs

*Enable Power Apps(MDA) and custom tools in Microsoft 365 Copilot*

# The Power Series

**One Catalog. Five Tracks. Endless Possibilities.**

**Let your business need shape the solution.**

The Power Series gets you hands-on with every Power Platform capability, so you design the right solution for any business process – one or more apps, automations and agents, working together on a governed foundation. Run a track end to end, or pick the modules that fit your scenario, audience and skill level.

## **Digitize Internal Operations**

Replace manual work with focused apps and connected data

## **Automate workflows and processes**

Reduce repetitive work with automation, approvals, and AI

## **Improve customer interactions**

Create secure experiences for customers, partners and communities

## **Modernize existing applications**

Evolve legacy solutions with modern apps, automation, and AI

## **Strengthen governance and security**

Apply guardrails, visibility, and control across the platform

# The Power Series

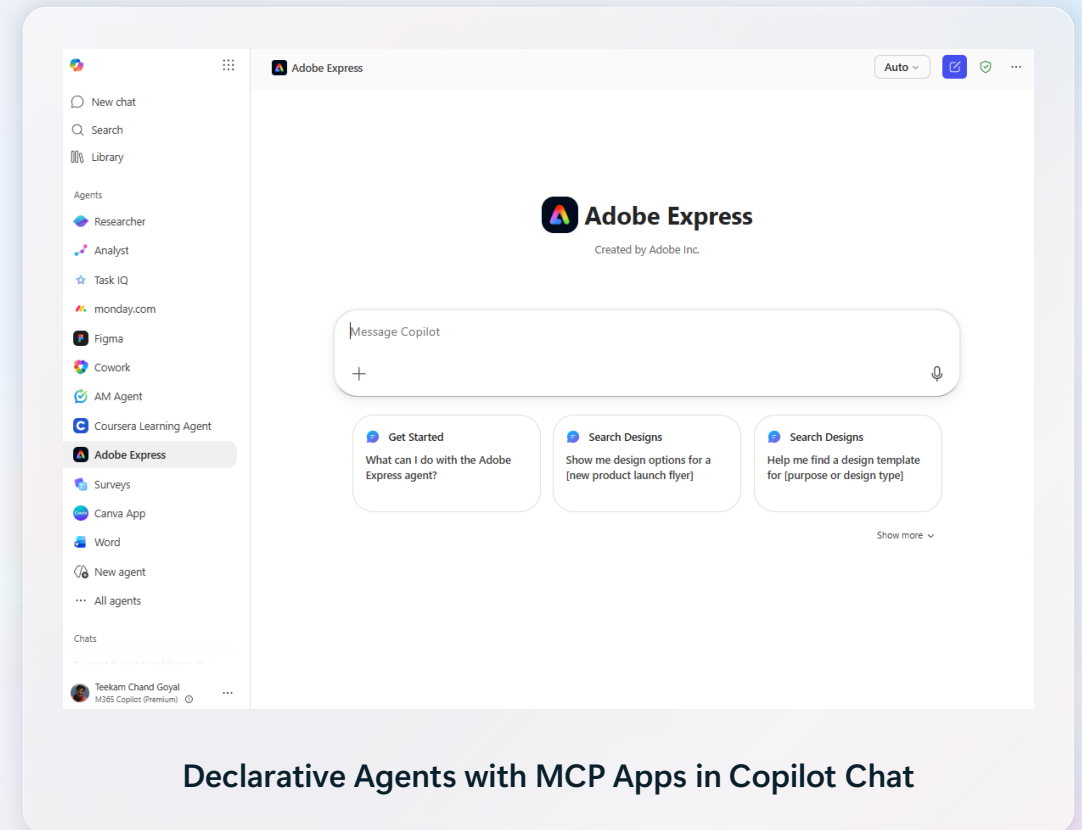

## Lab: Enable Power Apps(MDA) and custom tools in Microsoft 365 Copilot

- Configure a model-driven app as a declarative agent, sideload it to Teams and update records in chat
- Extend the agent with a custom MCP tool and widget

# Introduction to MCP Apps in Agents

- *Model Context Protocol (MCP) is the **open industry standard** that allows AI applications to connect to enterprise apps.*
- *MCP Apps is an MCP Extension that enables developers to bring their own app specific UI right into chat with **rich and interactive HTML/JS** - forms, tables, dashboards, videos, maps – enabling end to end workflows.*
- *Both MCP and MCP Apps have seen broad **industry wide adoption**, with thousands of official MCP servers and large community support, backed by top AI players – OpenAI, Anthropic, and Microsoft.*
- ***Chat is the new OS.** Agents can securely connect to data and deliver rich, interactive experiences directly inside the chat (via HTML/JS)*

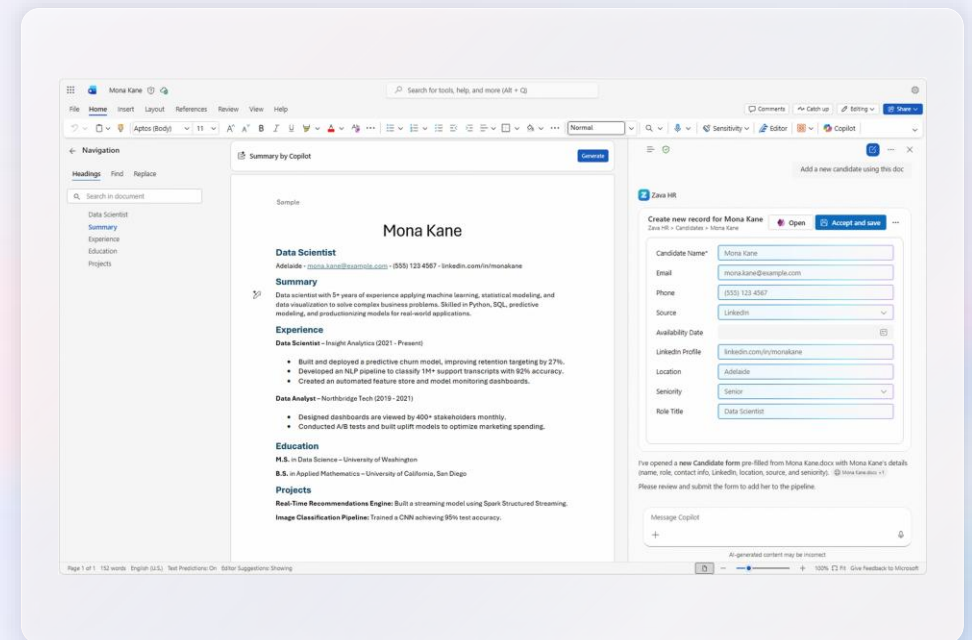

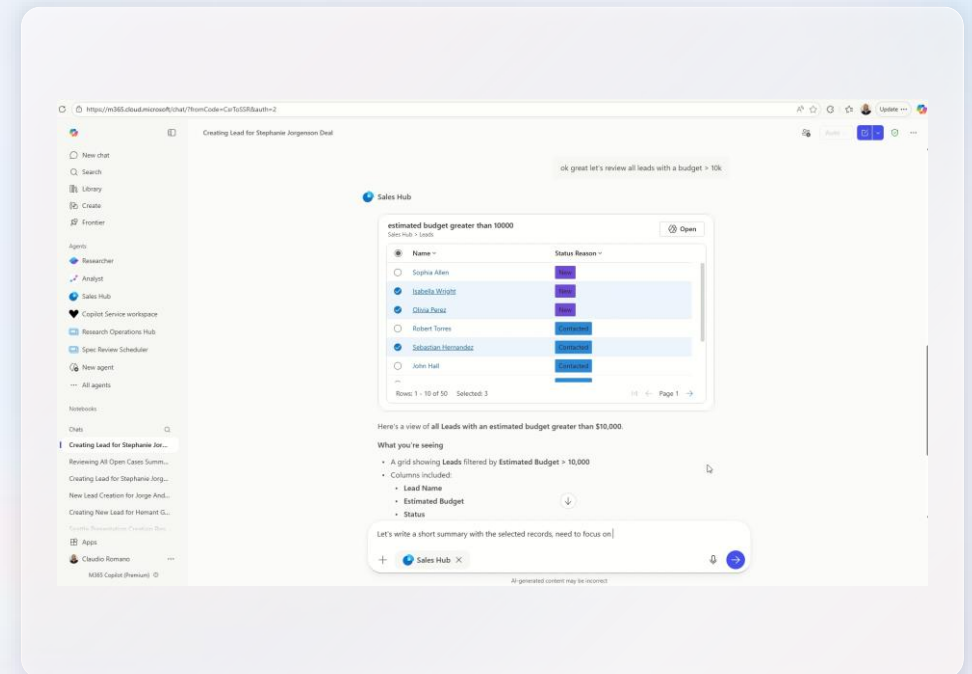

Declarative Agents with MCP Apps in Copilot Chat

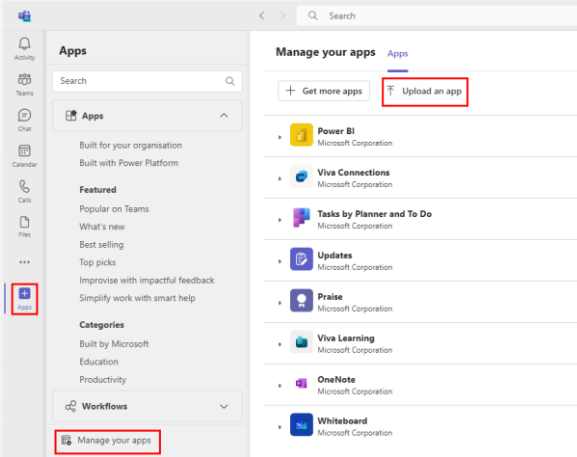

# Power Apps as Declarative Agents in Copilot Chat: Low-code approach

- *Power Apps can surface directly as declarative agents within Microsoft 365 Copilot*
- *Conversational access to enterprise business data*
- *Interactive data grids available inline within Chat*
- *Create and update business records within Copilot forms*
- *Seamless deep linking to full Power App experience*

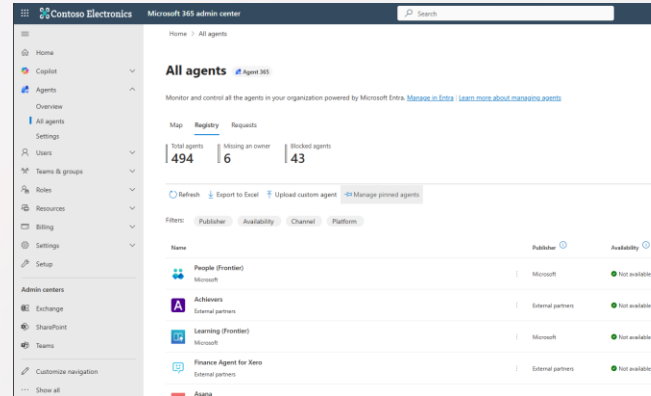

# Publish for yourself, organization or public agent store

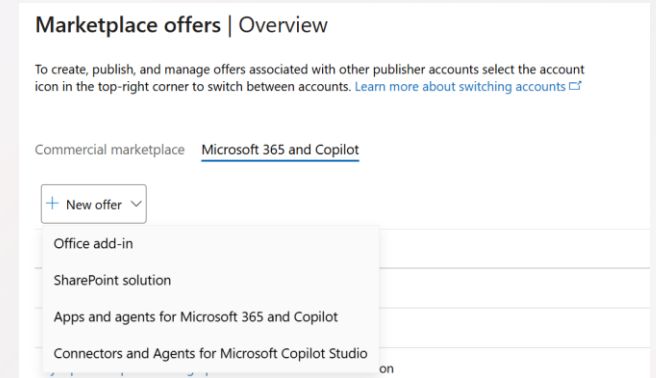

## Sideload for quick testing

- Share within your organization without going through publishing
- No admin approval required for each agent – ideal for developer testing and iteration. Note that admins need to [enable sideloading](#) once, if not already done.
- Not discoverable in the Agent Store; limited to developers and selected testers

## Deploy to your organization

- [Publish via Microsoft 365 Admin Center](#) for org-wide rollout
- IT admins review and approve before the agent is made available
- Appears in the Agent Store; scopeable to specific users or groups based on org policies

## Publish to the public Agent Store

- Submit to the Microsoft 365 Agent Store for cross-tenant discovery
- Microsoft validates the submission; agent listed in the Commercial Marketplace
- Once IT-enabled per tenant, accessible in Teams, Outlook, Word, Excel, and PowerPoint

# Turn AI responses into action-ready business experiences

*Move beyond chat-based answers by giving users an interactive experience: cards, forms, dashboards, and actions inside the tools they already use.*

## **Business scenario: Customer support resolution**

A support agent asks an AI assistant about a customer issue.

- The AI assistant securely retrieves relevant case, order, and product information.
- The answer appears as an interactive case workspace.
- The agent can review details, update the case, and **triggers next steps without switching systems or applications.**

**Impact:** faster resolution, fewer handoffs, better agent productivity, and higher customer satisfaction.
